

CS TAT RFP Announcement

24 October, 2014

DTIC and the DoD IACs are pleased to announce the issuance of a Request for Proposals (RFP) for the Cyber Security and Information Systems Technical Area Tasks (CS TAT) contract. CS TATs will be a five year, indefinite delivery/indefinite quantity, multiple-award contract for CS TAT research and analysis services. The planned acquisition strategy establishes two pools: an unrestricted full and open pool and partial small business set aside pool for work \$3.5M in value and below. The contractors will compete to perform separate customer-funded task orders (TATs) for studies, complex analysis, and engineering and technical services that generate scientific and technical information within the CS scope areas. The contract user base will consist of all DOD and federal government requesting agencies, as well as other entities authorized to use IAC services. CS TATs is a \$2.4B follow-on acquisition to the IAC Software, Networks, Information Analysis and Modeling and Simulation (SNIM) contract vehicle.
